

## 2019-2020 Cancer Registry & Surveillance Webinar Series Course Description

### Breast

10/03/19

*Wilson Apollo, CTR, Radiation Therapist*

*Jim Hofferkamp, CTR*

This 3-hour class will present the following information for breast: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatment. We will have a special emphasis on coding radiation.

### Bladder

11/7/19

*Iris Chilton, CTR, Alberta Cancer Registry*

*Jim Hofferkamp, CTR*

This 3-hour class will present the following information for bladder and kidney: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatments and how to code them.

### Base of Tongue

12/5/19

*Wilson Apollo, CTR, Radiation Therapist*

*Jim Hofferkamp, CTR*

This 3-hour class will present the following information for base of tongue: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatment. We will have a special emphasis on coding radiation.

### Prostate

1/09/20

*Bobbi Matt, BS, RHIT, CTR, State Health Registry of Iowa*

*Jim Hofferkamp, CTR*

This 3-hour class will present the following information for prostate: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatments and how to code them.

### SSDI's an In-Depth Look

2/06/20

*Jennifer Ruhl, Chair SSDI WG, Public Health Analyst NIH/NCI SEER*

*Jim Hofferkamp, CTR*

This 3-hour class take a close look at Site Specific Data Items (SSDI's). SSDI's are data item that are only collected for certain sites. We will take a close look at SSDI's for certain sites. We will look at why the information is important, how the information is collected, and review coding rules for the SSDI's.

### Abstracting and Coding Boot Camp: Cancer Case Scenarios

3/05/20

*Jim Hofferkamp, CTR*

This 3-hour class will present case scenarios on multiple sites and histologies. We will abstract and code each scenario; determine the number of primary tumors; code cancer identification, stage of disease, and treatment data items.

## **Melanoma**

**4/02/20**

***Denise Harrison and Louanne Currence. Trainers and CTR's***

This 3-hour class will present the following information for melanoma: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatments and how to code them

## **Central Nervous System**

**5/07/20**

***Denise Harrison and Louanne Currence. Trainers and CTR's***

This 3-hour class will present the following information for central nervous system: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatments and how to code them.

## **Esophagus**

**6/11/20**

***Tonya Brandenburg, CTR, Kentucky Cancer Registry***

***Jim Hofferkamp, CTR***

This 3-hour class will present the following information for esophagus: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatments and how to code them.

## **Navigating the 2020 Survey Application Record (SAR)**

**7/09/20**

***Guest Presenter: Cynthia Boudreaux, LPN, CTR, Owner/Consultant CB Professional Abstracting***

The Survey Application Record (SAR) is a very important part of the Commission on Cancer Accreditation. Interpreting the standards, and then demonstrating compliance within the confines of the SAR can be challenging. This webinar provides best practices and explanations on how to achieve success both in actions (clinical practice) and on paper.

## **Corpus Uteri**

**8/06/20**

***Guest Presenters: Denise Harrison & Louanne Currence***

This 3-hour class will present the following information for Corpus Uteri: anatomical information needed to abstract and code the cases; how to determine the number of primary tumors; how to code topography and histology; how to code the stage data items; and the treatments and how to code them.

## **Coding Pitfalls**

**9/03/20**

***Co-hosts: Janet Vogel, Compliance and Quality Auditor/Educator-Cancer Registry***

***himagine solutions, inc.***

***Jim Hofferkamp, CTR***

This 3-hour class will address coding dilemmas identified through quality control of registry data and present solutions with rationale for determining the number of primary tumors using the Solid Tumor Rules; assigning ICD-O-3 topography and histology codes using the ICD-O-3 Manual and Solid Tumor Rules; completing the stage of disease data items using AJCC Cancer Staging Manual, 8<sup>th</sup> Edition and Summary Stage 2018; and completing treatment data items as required by all standard setters.

The following subscription packages are available:

Webinars	Cost
12 Webinars	\$1,440 USD
9 pre-selected webinars Breast, Bladder, SSDI's, Boot Camp, CNS, Esophagus, 2020 SAR, Corpus Uteri, Coding Pitfalls	\$1,215 USD
6 pre-selected webinars Breast, Bladder, Boot Camp, CNS, 2020 SAR, Coding Pitfalls	\$900 USD
Single Webinar	\$185 USD
1 remote staff member*	\$100 USD
3 remote staff members*	\$200 USD
5 remote staff member*	\$300 USD

\* webinar package needs to be purchased in order to purchase remote a single webinar or

Visit <https://www.naaccr.org/cancer-registry-surveillance-webinar-series/> for more information and to purchase.
