

# Step 12: The CaRRI Database

- **Cancer Registry Research Information (CaRRI) database**
- Captures information for researchers interested in using registry data (e.g. contacts, data years, types of studies, details about IRB/registry review process, fees, required consent, etc.)
  - *Also used to populate VPR-CLS*
- **NEW FOR THIS YEAR:**
  - *State laws and regulation data will*
  - *In 2021, data will be made publicly*
- **Search Capability:** Available to registry administrators

# Entering information in the CaRRI database

- Who should submit?
  - *All registries including Canadian provinces*
- When to enter responses?
  - *Annually, after other Call for Data requirements completed*
  - *As needed when things change throughout the year*
- Amount of time to complete?
  - *Minimal time for annual review and update, longer for first time*
- How to enter data?
  - *Accessible from the NAACCR Call for Data submission site*
  - *Active users with role of 'Registry Administrator' with MyNAACCR c*
- Instructions posted on NAACCR Call for Data website

## CARRI DATABASE FORMS

### General Information

Not yet updated.

### IRB and Registry Request Information

Not yet updated.

### Data Request Process and Reporting Requirements

Not yet updated.

### Consent Requirements

Not yet updated.

### Fees for Requests

Not yet updated.

[View Form Summary Report](#)

Each registry is asked to enter or review their information during the annual NAACCR Call for Data, at a minimum. After you have fully reviewed all information, please let NAACCR know by **'Marking it as reviewed' with the button below**. If information changes during the year, you may update the system at any time to maintain accuracy.

For questions about the CaRRI Database, contact Recinda Sherman via email at [rsherman@naaccr.org](mailto:rsherman@naaccr.org) or by phone, (217) 698-0800 x6

### Comments/notes

Optional notes about changes. NAACCR will be notified upon submission.

Mark as reviewed

# Step 13: Create the VPR-CLS linkage file

- Single file to be used for all linkages facilitate by the Virtual Pooled Registry Cancer Linkage System
- For US registries only
- Full participation requested from non-VPR registries
  - *Support potential initiatives not part of VPR-CLS*
- File contains identifiers & remains at the cancer registry

# Basic Guidance for VPR-CLS file creation

## ■ Timeframe for File Creation:

- *By January 31, 2021*
- *After 12-month data submitted to NAACCR, NPCR, and SEER*

## ■ Case Selection Criteria:

- *Reportable cases submitted to NAACCR*
- *Cases from registry inception year to 2019, at a minimum*
- *Include DCOs and cases from VA and inter-registry*

## ■ Ability to identify and describe non-releasable cases

# Basic Steps for VPR-CLS file creation

- Extract fully populated Type C records (Version 18)
  - From registry inception year, or older, to 2019
  - All data items, including patient identifiers
- Run the file through NAACCR Prep using VPR configuration
- Retain the file at the registry for future VPR-CLS linkages
- Detailed instructions for creating the VPR-CLS linkage file posted on NAACCR Call for Data website
